ZPAS

Front view

Rear view

Compact wall-mounted cabinet for installation of electrical equipment to be protected against unauthorized access, dust and moisture.

Intended for indoor use.

CABINET DESIGN

- Tightly welded cabinet body.
- Openings for the gland plate in the bottom and top of the body.
- A groove around the door opening to prevent dirt and water entering the cabinet.
- Door with cast gasket, lockable by two single-point locks with double-bit insert.
- Mounting plate fixed to the rear side of the cabinet.
- Gland plates (blanking plates) with cast gasket, fixed with screws.
- On the rear side of the cabinet holes for fixing the cabinet directly to the wall or using hanging brackets.
- The cabinet body, door and gland plates with earthing studs.
- Holes for fixing the earthing strip in the mounting plate.
- Easy change of door opening direction
- Maximum door opening angle: 120°.
